⁶*Department of Biochemistry Institute of Soil Science and Plant Cultivation, ul. Czartoryskich 8, 24-100 Pulawy, Poland*

The non-target effects (soil and water organisms) and target effects (weeds, insects and fungi) at varying concentrations will be compared for MBOA, BOA, APO, AAPO, AMPO, AAMPO.

ACKNOWLEDGMENTS

The research described in this abstract was performed as part of the project "FATEALLCHEM", "Fate and Toxicity of Allelochemicals (natural plant toxins) in Relation to Environment and Consumer". The project was carried out with financial support from the Commission of the European Communities under the Work programme Quality of Life, contract no. QLK5-CT-2001-01967.
